Introduction

This plan has been guided by Schedule 10, relating to Disability, of the Disability Act 2010 and the principles of the Disability Discrimination Act 1995 (DDA) as amended by the SEN and Disability Act 2001.

As defined by the Equality Act, we understand a person with a disability to be identified as follows: 'A person who has a physical or mental impairment that has a 'substantial' and 'long term' negative effect on your ability to do normal daily activities'

Physical or mental impairment includes sensory impairments and also hidden impairments. In the DDA 'substantial' means 'more than minor or trivial'. 'Long term' means 'has lasted or is likely to last more than 12 months'.

This definition is broad and includes children and adults with a wide range of impairments, including learning disabilities, dyslexia, autism, speech and language impairments, Attention Deficit and Hyperactivity Disorder (ADHD), diabetes or epilepsy, where the effect of the impairment on the pupil's ability to carry out normal day to day activities is adverse, substantial and long term. All of those with cancer or surviving cancer, HIV or Multiple Sclerosis are now included from the point of diagnosis.

The test of whether the impairments affect normal day to day activity is whether it affects one or more of the following:

- Mobility
- Manual dexterity
- Physical co-ordination
- Continence
- Ability to lift, carry or otherwise move everyday objects
- Speech, hearing or eyesight
- Memory or ability to concentrate, learn or understand
- Perception of risk of physical danger

Our planning addresses the following areas:

- **Awareness** - Improving awareness of Equality and Inclusion by building awareness of staff through training and development and heightening children's awareness of issues related to disability
- **Physical facilities** - Improving access to the physical environment of the school, adding specialist facilities as necessary, to secure access for pupils, staff, parents and visitors. This covers improvements to the physical environment of the school and physical aids to access education.

- **School Curriculum** - Increasing access to the curriculum for pupils with a disability, expanding the curriculum as necessary to ensure that pupils with a disability are as equally prepared for life, as the able-bodied pupils. This covers teaching and learning and the wider curriculum of the school such as participation in after-school clubs, leisure and cultural activities or school visits. It also covers the provision of specialist aids and equipment, which may assist these pupils in accessing the curriculum.
- **Communication of Information** - Improving the delivery of written information to pupils, staff, parents and visitors with disabilities. Examples might include handouts, timetables, textbooks and information about the school and school events. The information should be made available in various preferred formats within a reasonable time frame
- **Support services** – access to services within and external to the school to support families where a disability is identified

## Awareness

### Process for identifying barriers

- Observations of learning
- Feedback from pupils, parents, staff and visitors
